For the first time in one volume, Phil Edmonston, Canada's automotive "Dr. Phil," covers all used vehicles, packing this guide with insider tips to help the consumer make the safest and cheapest choice possible from cars and trucks of the past 25 years.

"The automotive maven and former Member of Parliament might be the most trusted man in Canada,

an inverse relationship to the people he writes about." – The Globe and Mail Lemon-Aid shows car and truck buyers how to pick the cheapest and most reliable vehicles from the past 30 years of auto production. This brand-new edition of the bestselling guide contains updated information on secret service bulletins that can save you money. Phil describes sales and service scams, lists which vehicles are factory goofs, and sets out the prices you should pay. As Canada's automotive "Dr. Phil" for over 40 years, Edmonston pulls no punches. His Lemon-Aid is more potent and provocative than ever.

As U.S. and Canadian automakers and dealers face

bankruptcy and Toyota battles unprecedented quality-control problems, Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. Phil Edmonston, Canada's automotive "Dr. Phil" for more than 40 years, pulls no punches. In this all-new guide he says: Chrysler's days are numbered with the dubious help of Fiat. Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future. Be wary of "zombie" vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz -- rich cars, poor quality. There's only one Saturn you should buy. Toyota -- enough apologies: "when you mess up, 'fess up."

"Mr. Dahlstrom...has written a superb history of the tractor and this long-forgotten period of capitalism in U.S. agriculture. We now know the whole story of when farming, business and the free-market economy diverged, divided and conquered." —Wall Street Journal Discover the untold story of the "tractor wars," the twenty-year period that introduced power

farming—the most fundamental change in world agriculture in hundreds of years. Before John Deere, Ford, and International Harvester became icons of American business, they were competitors in a forgotten battle for the farm. From 1908-1928, against the backdrop of a world war and economic depression, these brands were engaged in a race to introduce the tractor and revolutionize farming. By the turn of the twentieth century, four million people had left rural America and moved to cities, leaving the nation's farms shorthanded for the work of plowing, planting, cultivating, harvesting, and threshing. That's why the introduction of the tractor is an innovation story as essential as man's landing on the moon or

the advent of the internet—after all, with the tractor, a shrinking farm population could still feed a growing world. But getting the tractor from the boardroom to the drafting table, then from factory and the farm, was a technological and competitive battle that until now, has never been fully told. A researcher, historian, and writer, Neil Dahlstrom has spent decades in the corporate archives at John Deere. In *Tractor Wars*, Dahlstrom offers an insider's view of a story that entwines a myriad of brands and characters, stakes and plots: the Reverend Daniel Hartsough, a pastor turned tractor designer; Alexander Legge, the eventual president of International Harvester, a former cowboy who took on

Henry Ford; William Butterworth and the oft-at-odds leadership team at John Deere that partnered with the enigmatic Ford but planned for his ultimate failure. With all the bitterness and drama of the race between Ford, Dodge, and General Motors, Tractor Wars is the untold story of industry stalwarts and disruptors, inventors, and administrators racing to invent modern agriculture—a power farming revolution that would usher in a whole new world.

The United States is among the wealthiest nations in the world, but it is far from the healthiest. Although

life expectancy and survival rates in the United States have improved dramatically over the past century, Americans live shorter lives and experience more injuries and illnesses than people in other high-income countries. The U.S. health disadvantage cannot be attributed solely to the adverse health status of racial or ethnic minorities or poor people: even highly advantaged Americans are in worse health than their counterparts in other, "peer" countries. In light of the new and growing evidence about the U.S. health disadvantage, the National Institutes of Health asked the National Research Council (NRC) and the Institute of Medicine (IOM) to convene a panel of experts to study the issue. The

Panel on Understanding Cross-National Health Differences Among High-Income Countries examined whether the U.S. health disadvantage exists across the life span, considered potential explanations, and assessed the larger implications of the findings. U.S. Health in International Perspective presents detailed evidence on the issue, explores the possible explanations for the shorter and less healthy lives of Americans than those of people in comparable countries, and recommends actions by both government and nongovernment agencies and organizations to address the U.S. health disadvantage.
