The field of engineering is divided into a large number of specialty areas: Mechanical engineering involves design, manufacturing, inspection and maintenance of machinery, equipment and components ...

What is Engineering? | Types of Engineering | Live Science

In Engineering Design, the focus is on development, validation and dissemination of advanced design methods for technical systems, in particular mechanical systems. In Biomechanics , engineering principles taken from the traditional disciplines of mechanics and materials are applied to biological systems, with applications in biology, biotechnology and medicine.

Mechanics, Materials and Design | Department of Engineering

Overview. Design engineers are problem solvers who bridge the gap between traditional engineering and design. It's a discipline which draws on knowledge of manufacturing techniques, product development, technical design and rapid prototyping to bring new innovations to market. It also focuses on improving existing products and the processes used for making them.
