## ExamPlanning

Python Programming Exercises and Solutions PDF. Python is a high-level, structured, open source scripting language. It is multi-paradigm and multi-use. Originally developed by Guido van Rossum in 1989, it is, like most open source applications and tools, maintained by a team of developers around the world. Designed to be object-oriented, it nevertheless has the tools to engage in functional or imperative programming; this is one of the reasons which has earned it the name "agile language ...
