On July 4, 1776, the United States declared itself a free and independent nation. Two weeks later, the Continental Congress began working on the Articles of Confederation to create a government for the new country. By 1787 that government was found to be ineffective. A convention was called to amend the articles. The delegates quickly realized amendment wasn't enough, a new type of government had to be created. The result of their deliberations was the Constitution of the United States, ratified in 1789. The First Congress proposed ten amendments, known as the Bill of Rights. Over the next 210 years there were seventeen more amendments. This book will help you to read, study and understand the founding documents of our nation as well as the rights and responsibilities of our government and citizens.

American government is required for high school graduation in most of the United States, but most of us receive very little instruction on the contents of the United States Constitution itself. This study guide is designed to guide small groups in delving into the United States Constitution and discovering the original intent of the Founders. The guide will take you from the Mayflower Compact to the 27th Amendment of the United State Constitution, studying in depth the original documents, interpreted by the words of the Founders themselves. Who were the signers of the Declaration of Independence and the United States Constitution? What is the proper jurisdiction of the judicial branch of the government? Why was a bill of rights a necessary addition to the Constitution? This guide explores the answers to these questions and more in a relaxed small group environment that encourages true learning and a love of American heritage.

This edited collection explores the roles of material culture in socializing young people through their play. Authors explore notions of play from diverse cultural viewpoints, as well as the impact of technology on play, and the kinds of resistant and liberatory play children might partake in. Informed by the field of performance studies, the book considers play as performance, asking questions about embodiment at physical, relational, and ideological levels, and considering «performance» to be part of identity construction, as well as a component of enculturation into various societies. Of interest are the ways in which children try on various identities through their play, and how these identities may (re)define their attitudes, values, and beliefs. As curriculum and instruction have become open to the use of games - and children's material culture more generally - as a forum for learning, intersections have emerged between schooling and culture at large. This book broadens the scope of «learning» to investigate how these cultural artifacts are open or closed to multiple perspectives and narratives, as well as how their use is constituted both in and out of the classroom.

It's the revolutionary American history study guide just for middle school students from the brains behind Brain Quest. Everything You Need to Ace American History . . . covers Native Americans to the war in Iraq. There are units on Colonial America; the Revolutionary War and the founding of a new nation; Jefferson and the expansion west; the Civil War and Reconstruction; and all of the notable events of the 20th century—World Wars, the Depression, the Civil Rights movement, and much more. The BIG FAT NOTEBOOK™ series is built on a simple and irresistible conceit—borrowing the notes from the smartest kid in class. There are five books in all, and each is the only book you need for each main subject taught in middle school: Math, Science, American History, English Language Arts, and World History. Inside the reader will find every subject's key concepts, easily digested and summarized: Critical ideas highlighted in neon colors. Definitions explained. Doodles that illuminate tricky concepts in marker. Mnemonics for memorable shortcuts. And quizzes to recap it all. The BIG FAT NOTEBOOKS meet Common Core State Standards, Next Generation Science Standards, and state history standards, and are vetted by National and State Teacher of the Year Award–winning teachers. They make learning fun, and are the perfect next step for every kid who grew up on Brain Quest.
