transmission fluid was low so we added Honda transmission fluid. That's when the cars rpms shot up and I wasn't hardly moving. Honda said do a 9 quart quart flush, which we did. For a day or two things seemed better, then it was far worse than before with the rpms at 6,000 and I'm only going 30.

Automatic Transmission Problems of the 2005 Honda Accord  
The Honda Accord's reservoir size is around a quart; however, it's advisable when changing the power steering fluid to have around 3 to 4 quarts on standby. That acts as contingency to ensure the changing process is thorough. In the process of filling the power steering fluid, air gets sucked in and bubbles in the fluid are evident.

The 2005 honda accord's transmission uses 7.6 Quarts of atf fluid. Upvote (0) Downvote (0)

What's the 2005 Honda Accord transmission fluid capacity? Automatic transmission fluid keeps the transmission lubricated and functioning properly. The transmission filter keeps dirt and other particles out of the fluid, and thus out of your transmission. The transmission is responsible for sending the right amount of engine power to the driveshaft or axles, and making them go at the speed you want.
