Springboard: Introduction to Design

What is design? Depending on the industry we are talking about, design can have many different definitions. Most generally, [!design!](#) is a process for deliberately creating a product to meet a set of needs. Mobile app development requires both engineering design and product design. Engineering design focuses on physics, such as speed, mass and other performance measures while product design also considers user and consumers by asking what the user wants in a product.

1 Introduction to Design and the Concept Development Process

An introduction to Design Thinking starts by placing the human experience [!](#) what people want, need, and value [!](#) at the center of your design thinking. As opposed to optimizing for other metrics or stakeholders, like product speed, financial profits, or aesthetics, the design thinking process starts by prioritizing the primal needs of the human users.
