A year-old murder in the rainforest of Costa Rica haunts Raven MacMillan. Details of the tragedy she witnessed remain suppressed deep inside her subconscious. When circumstances force her to return to the scene of the crime, someone makes it abundantly clear: Raven isn't welcome. Finally healing from his girlfriend's murder, human clone Kyle Jones is on a mission: find the stolen trackers scientists are using to control the actions of innocent children. When he meets Raven, he uses his supernatural gift to explore her repressed memories and discovers the missing trackers have everything to do with who is now watching Raven. And who killed his first love. As past and present collide, Raven struggles to face her demons, but remembering the truth of that fateful night could prove fatal. And Kyle will do anything to ensure the past isn't repeated.

She was created for a purpose so revolutionary, someone was willing to kill for it. Seventeen-year-old Lexi Matthews keeps two secrets from her elite boarding school classmates—she's the daughter of a famous and controversial geneticist, and she can influence people's thoughts. But after new student Jack DeWeese heals her broken arm with an anything-but-simple touch, he forces Lexi to face a new reality—her abilities reach much further than speaking to the minds of others. After Lexi's father goes missing and she receives threatening emails,

she can't decide whether to fall into Jack's arms or run and hide. As Lexi seeks answers to what she and Jack are, she discovers a truth more unsettling than anything her science books can teach. And letting Jack into her life of secrets is not only a threat to her very existence, but it just might break her heart wide open.

This is the second book in the Mindspeak series. An intruder has seized control of Lexi Matthew's mind, putting those closest to her in grave danger. When someone snakes into Lexi's head and threatens Jack's life at Lexi's own hand, she must quickly decide: leave Jack and the web of lies and controversial medical science behind in order to protect him, or stay and fight to regain control of her own mind but risk Jack's life. Before Lexi can choose, she's immersed into the underground world of the International Intelligence Agency, where she discovers the realm of cloning and mind control is much larger than she and Jack ever imagined and is growing bigger and more dangerous. As the band of teenage human clones uncovers more of their supernatural abilities, a dominant force inside the IIA is at work to take over their powers. Can Lexi stop the person who has invaded her mind before the IIA captures them all, or will she sacrifice herself to save those she loves?
