Modeling A Gene Pool Lab Answers

Somewhere in the upper left corner (in this case, cell D2), enter a value for the frequency of the A allele. This value should be between 0 and 1. Go ahead and type in labels in your other cells and, if you wish, shade the cells as well. This blue area will represent the gene pool for your model.

Hardy Weinberg Lab (AP Bio Lab #2) - Mrs. Strong's AP Bio ...

Model # 1. Classical Hypothesis: It was developed by T.H. Morgan (1932) and supported by H.J. Muller and Kaplan (1966). The classical hypothesis proposes that the gene pool of a population consists at each gene locus of a wild-type allele with a frequency approaching one. Mutant alleles in very low frequencies may also exist at each locus.
