Industries and particularly the manufacturing sector have been facing difficult challenges in a context of socio-economic turbulence characterized by complexity as well as the speed of change in causal interconnections in the socio-economic environment. In order to respond to these challenges companies are forced to seek new technological and organizational solutions. In this context two main characteristics emerge as key properties of a modern automation system – agility and distribution. Agility because systems need not only to be flexible in order to adjust to a number of a-priori defined scenarios, but rather must cope with unpredictability. Distribution in the sense that automation and business processes are becoming distributed and supported by collaborative networks. Emerging Solutions for Future Manufacturing Systems includes the papers selected for the BASYS ' 04 conference, which was held in Vienna, Austria in September 2004 and sponsored by the International Federation for Information Processing (IFIP).

"The scope and content of international finance have been fast evolving due to deregulation of financial markets, product innovations, and technological advancements. As capital markets of the world are becoming more integrated, a solid understanding of international finance has become essential for astute corporate decision making. Reflecting the growing importance of international finance as a discipline, we have seen a sharp increase in the demand for experts in the area in both the corporate and academic worlds. In writing International Financial Management, ninth Edition, our goal was to provide well-organized, comprehensive, and up-to-date coverage of the topics that take advantage of our many years of teaching and research in this area. We hope the text is challenging to students. This does not mean that it lacks readability. The text discussion is written so that a self-contained treatment of each subject is presented in a user-friendly fashion. The text is intended for use at both the advanced undergraduate and M.B.A. levels"--

Management: A Practical Introduction 9e empowers students to develop the management skills necessary in everyday life through the practical and relevant application of theory. Developed to help students read and learn management with a purpose, it takes a student-centered approach. The revision introduces a new strategic career readiness theme throughout to address employers ' concerns about students graduating without being career ready. It continues to engage students through current examples, imaginative writing, and resources that work. Their unique Teaching Resource Manual offers numerous suggestions for creating a discussion-oriented, experiential classroom.
