37.1: The Circulatory System. divides the right side of the heart from the left side. Prevents the mixing of oxygen-poor blood with oxygen- rich blood. when blood clots formed as a result of atherosclerosis may break free and get stuck in one of the blood vessels leading to a part of the

37 1 The Circulatory System Answer Key
Humans and other vertebrates have closed circulatory systems. This means that a circulating fluid called blood is contained within a system of vessels. The human circulatory system consists of the heart, a series of blood vessels, and the blood that flows through them. 37 – 1 The Circulatory System 1 FOCUS
