Letters of Credit: Theory and Practice explains in simple English all the important information you ' ll ever need on letters of credit (LC). This book provides extensive, easy-to-understand, practical and useful suggestions to help during negotiations, in selecting the right terms of payment, improving operations, reducing errors and risks, facilitating trade and final settlement, and much more. It is extensively researched, delving deep into the subject of international trade, presenting current issues and solutions related to LCs that the reader may not otherwise come across easily. A gold mine of information on payment risk management, it ' s the last word on documentary credits. " This book is a great read for knowledge and practical information on letters of credit. It succinctly takes the reader through the concepts of risk management, explains the fundamentals of global trade finance issues, the dilemmas plaguing international sellers and buyers, and standardised ways for the buyer and the seller to secure goods and make payments, respectively. This is a must-read book for academicians, exporters, importers and bankers looking for complete, authentic information on international trade finance and global business. " - Dr. Deepankar Sinha, Professor; Head - Research Division, Kolkata Campus; Programme Director - Centre for Trade and Logistics (CFTL), Kolkata Campus, Indian Institute of Foreign Trade (IIFT)

A PDF version of this book is available for free in open access via [www.tandfebooks.com](http://www.tandfebooks.com) as well as the OAPEN Library platform, [www.oapen.org](http://www.oapen.org). It has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 3.0 license and is part of the OAPEN-UK research project. This book traces the history and development of a mutual organization in the financial sector called SWIFT, the Society for Worldwide Interbank Financial Telecommunication. Over the last forty years, SWIFT has served the financial services sector as proprietary communications platform, provider of products and services, standards developer, and conference organizer ("Sibos"). Founded to create efficiencies by replacing telegram and telex (or ' wires ' ) for international payments, SWIFT now forms a core part of the financial services infrastructure. It is widely regarded as the most secure trusted third party network in the world serving 212 countries and over 10,000 banking organizations, securities institutions and corporate customers. Through every phase of its development, SWIFT has maintained the status of industry cooperative thus presenting an opportunity to study broader themes of globalization and governance in the financial services sector. In this book the authors focus on how the design and current state of SWIFT was influenced by its historical origins, presenting a comprehensive account in a succinct form which provides an informative guide to the history, structure, activities and future challenges of this key international organization. This work will be of great interest to students and scholars in a wide range of fields including IPE, comparative political economy, international economics, business studies and business history.

This document provides the comprehensive list of Chinese Industry Standards - Category: MT; MT/T; MTT.

An inside view of the forces which shaped SEPA and the PSD written from the unique perspective of someone closely involved throughout the process. It uncovers the strategic, legal and practical implications of the full harmonization agenda and provides an assessment of where these initiatives stand today, including key lessons learned.

This volume constitutes the refereed proceedings of the Confederated International International Workshop on Enterprise Integration, Interoperability and Networking (EI2N) , Fact Based Modeling ( FBM), Industry Case Studies Program ( ICSP ), International Workshop on Methods, Evaluation, Tools and Applications for the Creation and Consumption of

Structured Data for the e-Society (Meta4eS), and OnTheMove Academy (OTMA 2016), held as part of OTM 2016 in October 2016 in Rhodes, Greece. The 27 full papers presented together with 8 short papers were carefully reviewed and selected from 58 submissions. The OTM program every year covers data and Web semantics, distributed objects, Web services, databases, information systems, enterprise workflow and collaboration, ubiquity, interoperability, mobility, grid and high-performance computing.

Dramatic forces of change continue to sweep the financial services industry. The age of the empowered customer is here and are changing the way financial products are delivered, sold, and serviced, which are making relationships more complex than ever. The explosion of data and intense competition, which is combined with slow or inconsistent economic conditions, makes it imperative for financial institutions to find new and cost effective ways to increase market share, renew customer trust, and drive profitable growth. In this new business environment, the transaction processing arm of the industry is facing increased pressure to reduce float, better manage liquidity, and provide regulators and clients with increased transparency. At the same time, the industry must effectively manage the risks that are associated with introducing customer-focused and regionalized products and services. Financial Transaction Manager enables the management, orchestration, and monitoring of financial transactions during their processing lifecycle. Financial Transaction Manager provides the capability to integrate and unify financial transactions in various industry formats (including ISO 20022, SWIFT, NACHA, EDIFACT, ANSI X12 and others). By using Financial Transaction Manager, financial institutions gain visibility into message processing, balance financial risk, and facilitate effective performance management. This IBM® Redbooks® publication outlines how Financial Transaction Manager is deployed to realize the benefits of transaction transparency, increase business agility, and allow for innovation that is built on a robust and high-performance environment.

Provides a clear understanding of the law governing electronic funds transfers, with emphasis on global and domestic wire transfers, ACH payments and consumer transactions. Concise analysis of U.C.C. Article 4A, EFTA, Regulation E and other pertinent law gives you the information you need to understand the complex legal ramifications of electronic funds transfers. Details the law on such topics as:

- Acceptance, rejection, and execution
- Sender's payment obligation to accepting bank
- Liability for unauthorized payment orders
- Errors in payment orders and acceptance
- Cancellations, amendment, and reversal
- Damages for improper execution
- Beneficiary's rights: notice, payment, and discharge

Joined-up healthcare makes information available when and where it is needed to improve safety, efficiency and effectiveness. Politicians may take interoperability between healthcare computer systems for granted, but it is non-trivial. Healthcare integration projects are notoriously under-estimated and come in over-budget and over-time. Joined-up healthcare depends on standards. The two leading standards are the SNOMED CT, which is a clinical terminology (semantics) and HL7 Version 3, which is a specialised healthcare interoperability language (syntax). Both are new, complex and fit for purpose. Tim Benson believes there is an unmet need for a book on Healthcare Integration. Some health informatics textbooks include chapters on HL7 and/or SNOMED, but these are usually quite short and cannot provide even an adequate introduction. There is little of much value on the Internet, or in journals or conference proceedings.
