The book taught me a new way to approach the

markets. When I combined moving averages and good risk to reward setups discussed in this book, it created the potential for large wins and small losses. My trading results improved immediately. I experienced better results with less stress, because I stopped trying to predict the market or make decisions based on my opinions. Instead of worrying about what the market might do in the future, I learned to let the moving averages be my guide. I am fortunate enough to have seen Steve Burns place trades daily for the last two and a half years using the same strategies and approaches that he will teach you in this book. Steve really does practice what he preaches and teaches, and his results have been amazing. I have seen him ride profitable long-term trends to the upside, and even more impressively, stay completely in cash and out of large market drawdowns and crashes. I regularly see him make new equity highs when the market is not anywhere close to all-time highs. This second edition is great because it includes many more chart examples, which is helpful if you are a visual learner like I am. In this book, you will learn powerful concepts that if internalized and put into practice, will provide you with an approach that can make you money in the market for years to come. I feel so fortunate that I found this book back in 2016 and I would like to sincerely thank Steve and Holly Burns for taking the time to write it. My only regret is that I did not find this book sooner. Best of luck to all of you and Happy Trading. Gregory W. Gossett - Gossett Trading & Mentoring

When focusing on the method, many market gurus or books talk about moving averages and to buy and sell there but the why's are missing. This book give an excellent explanation of the why's. You'll get a better understanding of the risk/reward of your purchase decisions using the information gained in this book. Also, I see few books that have better explained to me the questions I had regarding moving averages for the price it's selling at." - Frederick M Robles
