The Solutions of a System of Equations A system of equations refers to a number of equations with an equal number of variables. We will only look at the case of two linear equations in two unknowns. The situation gets much more complex as the number of unknowns increases, and larger systems are commonly attacked with the aid of a computer.

A solution to a linear system is an assignment of values to the variables such that all the equations are simultaneously satisfied. A solution to the system above is given by $\begin{aligned} 2x + y + z &= 1 \\ x + y + z &= 2 \\ x + 2y + z &= 2 \end{aligned}$ since it makes all three equations valid.

System of linear equations - Wikipedia

El-Com Systems is a leader of electronic interconnect manufacturing and solutions. We specialize in complex cable assemblies and wire harnesses for high-reliability products and industries.
