King's Man by Tim Severin is the thrilling third volume in the captivating Viking trilogy - an epic adventure in a world full of Norse mythology and bloodthirsty battles. Constantinople, 1035: Thorgils has become a member of the Varangian lifeguard and witnesses the glories of the richest city on earth but also the murderous ways of the imperial family. Under the leadership of warrior chief Harald Sigurdsson he is set up as the unwitting bait in a deadly ambush to destroy Arab pirates harassing the Byzantine shipping lanes in the Mediterranean. When Harald eventually ascends the throne of Norway, his liegeman Thorgils is despatched on a secret mission to Duke William of Normandy with a plan to coordinate the twin invasions of England. On 20 September 1066 Harald's fleet of three hundred ships sails up the Ouse, confident of success, but a prophetic dream warns Thorgils that Duke William has duped his allies and the Norsemen are heading for disaster at Stamford Bridge. Thorgils embarks upon a race against time to reach and warn his liege lord before the battle begins. But will Odinn's devout follower really be able to anticipate what fate has decreed and save the heritage of his Viking ancestors?

The route they chose was the 'Stepping Stone' route (Hebrides, Faroes, Iceland and along the coast of Greenland). Nearly 900 years after Duke Godfrey de Bouillon set out on the First Crusade, Tim Severin set out with one woman and two horses to retrace his steps. Starting out from Chateau Bouillon in Belgium with the same breed of Ardennes Heavy Horse used by Duke Godfrey, Severin followed the historic trail for eight and a half months. Riding out of the green countryside of northern Europe into the heat and parched landscape of the Near East, he and his companion covered more than 2,500 miles, past ruined Crusader settlements and ancient battlefields, through arduous mountain passes and across barren Anatolian steppes. Across Germany, Austria, Hungary, (then) Yugoslavia, Bulgaria, Turkey and Syria, he followed the precise route of the medieval voyagers towards their common destination - Jerusalem.In this dazzling synthesis of adventure, practical history and exploration, Severin assesses just how far Duke Godfrey could have travelled each day; which routes the Crusaders would have taken and how they would have cared for themselves and their horses.

Chronicles the explorations of conquistadors, voyageurs, and charlatans who discovered, opened up and exploited the Mississippi River Valley.

The Spice Islands Voyage is about a journey and a quest: a journey among the Spice Islands of equatorial Indonesia aboard a traditional native sailing vessel; a quest to rediscover Alfred Russel Wallace, the brilliant and intrepid naturalist who jointly proposed, with Charles Darwin, the theory of natural selection, and whose travels founded the science of zoo geography. Navigating through sparkling coral seas to remote shorelines, Tim Severin and his crew retraced the explorer's journeys, encountering green turtles and flying foxes, observing the smuggling of rare birds and rainforest destruction, but also witnessing the emergence of a new sense of environmental awareness. 'Full of insights retraces a journey through places of fabulous natural and cultural diversity should inspire new readers to discover the remarkable writings of Wallace himself', Independent
