When four religious leaders walk across the road, it's not the beginning of a joke. It's the start of one of the most important conversations in today's world. Can you be a committed Christian without having to condemn or convert people of other faiths? Is it possible to affirm other religious traditions without watering down your own? In his most important book yet, widely acclaimed author and speaker Brian McLaren proposes a new faith alternative, one built on "benevolence and solidarity rather than rivalry and hostility." This way of being Christian is strong but doesn't strong-arm anyone, going beyond mere tolerance to vigorous hospitality toward, interest in, and collaboration with the other. Blending history, narrative, and brilliant insight, McLaren shows readers step-by-step how to reclaim this strong-benevolent faith, challenging us to stop creating barriers in the name of God and learn how affirming other religions can strengthen our commitment to our own. And in doing so, he invites Christians to become more Christ-like than ever before.

"Beginning in the jungles of Southeast Asia, trekking through the Middle East, traversing the Pacific, Lawler discovers the secrets behind the chicken's transformation from a shy, wild bird into an animal of astonishing versatility, capable of serving our species' changing needs. Across the ages, it has been an all-purpose medicine, sex symbol, gambling aid, inspiration for bravery, and of course, the star of the world's most famous joke. Only recently has it become humanity's most important single source of protein. Most surprisingly, the chicken--more than the horse, cow, or dog-- has been a remarkable constant in the spread of civilization across the globe"--Page 4 of cover.

Can lollipops reduce antisocial behaviour? Could wizards prevent street gambling? Do fake bus stops protect pensioners? Can dog shows help reduce murder rates? Stevyn Colgan spent thirty years in the police service--twelve of them as part of the Problem Solving Unit, a special team with an extraordinary brief: to solve problems of crime and disorder that were unresponsive to traditional policing. They could try anything as long as it wasn't illegal (or immoral), wouldn't bring the police into disrepute, and didn't cost very much. The result is this extraordinary collection of innovative and imaginative approaches to crime prevention, showing us that any problem can be solved if we can just identify its underlying roots. In Why Did the Policeman Cross the Road? you'll learn how bees can prevent elephant stampedes and what tiger farms and sex workers have in common. You'll read about killer snakes in African cornfields and cholera epidemics in Soho. You'll come to appreciate the advantages of sticking gum on celebrities' faces, why the colour of the changing room might decide a football match, and how eating lobsters may help to save their lives. This book is an amusing, insightful and sometimes controversial celebration of good policing and problem solving that reaches beyond law enforcement and into everyday life.

This little group of turtle pals loved to splash the day away in their familiar waterway. Should they venture out and cross the highway for a special adventure or have they listened to misinformation about how to cross over?

Find out what connects logic and humor in this alternative guide to logical reasoning. Combining jokes, stories, and ironic situations, Stan Baronett shows how it is possible to ground the language of logic in everyday experience. Each chapter introduces a basic logical reasoning concept based on happenings in daily life. Using jokes as his examples, Baronett reveals the inner workings of logic. After all an effective joke often relies on an unanticipated assumption that leads to an unexpected result. The assumption changes the normal context of an everyday situation, so we are surprised by the ending. A complex mind that learns from experience, and builds a storehouse of regularly recurring patterns, is a great survival tool. But for a joke to work, the punch line has to be something our minds don't logically anticipate. The ending jolts our minds for a split second while we grasp the absurdity of the situation. This is how logic works: one part of your mind determines whether the information you are receiving is true or false, while another part of your mind deals with logical consequences. Injecting a sense of humor into logical language, Baronett helps us understand how to analyze basic logical reasoning and provides light relief for anyone daunted by the complex world of logic.

A collection of essays on outmoded phrases and words we still use in everyday speech, told with the help of childhood memories, bits of Midwestern history, and liberal dashes of humor.

Judaism and Christianity differ from each other on the most fundamental issues. Yet both use the same Jewish Bible as the foundation of their faiths. Only one of these belief systems can be true. Those who talk about "Judeo-Christian heritage" have no idea that Judaism and Christianity are the most fundamentally conflicting principles in the history of humanity. They inherently cannot co-exist, as light cannot co-exist with darkness. History since the beginning of the Common Era testifies that humanity cannot afford to regard Christianity as an innocent lie, as a bad idea. A real war is being waged around us between alien spirits and God's angels. People usually ignore this unintuitive and invisible reality, but this ongoing celestial conflict often affects our everyday affairs, as if no one is in control. The Torah and the "New Testament" cannot co-exist, despite ongoing efforts of Christian preachers to prove the contrary. This book is intended to be an encouragement to those who have already begun to see though the vicious veil of the Christian delusion. The basic principle of Christianity is nonsense. Any human being with the weakest sense of justice would reject the idea that someone else died for his or her sins. The fake god came up with the death trick. Death will be its everlasting reward. Christians are desperate to support their faith with fabricated references from the Torah and Prophets, while those who live on the Torah have never needed the "New Testament" to support their faith. Everyone on this planet should have realized the issues presented in this book by now, as theological qualifications or credentials are not necessary to understand them. Mankind has been given more than 2,000 years to comprehend these ideas. Humanity has paid a heavy price for false rationalizations motivated by a wicked desire to cast off the Torah's requirements. Let us value and safeguard this wisdom acquired with difficulty with unspeakable gratefulness.

Farmer would just like to sleep in but his early morning slumbers are disturbed by his faithful companion, Donkey. And Donkey isn't there to bid Farmer a good morning. As it turns out, the prospect of fun and food has lured the farm's livestock to a local fair. Now it's up to Farmer and Donkey to go round up the wayward critters before they can get into too much trouble. Or is it too late? Young readers will laugh out loud at the antics of the farmer's chickens, goats, pigs, and one anxious cow in this quirky take on the traditional knock-knock joke.

More than 20 million people live in Florida, that unique land that juts off into the Atlantic. They are ranchers and golfers, sunbathers and retirees. And their lives often fall within the realm of the perfectly normal. But sometimes these Floridians, many of whom have flocked from elsewhere, find themselves in Sunshine State situations. Meet the acting student who had a close encounter with superstar Burt Reynolds, the New Yorker who put down roots here after attending a school of fish, the woman who barely found her house after a hurricane and a girl who survived--and thrived--after the Marjory Stoneman Douglas massacre. Professional storyteller Caren Schnur Neile traverses the state to share thirty-three true-life tales from everyday Floridians in extraordinary situations.
